Problem

The problem I want to tackle 'is that the dynamic of the traditional ecological learning process 'possesses many options to cultivate legitamite moral enuen throughout the animate-inanimate naturalization of creation learning, 'the anatomic timing co-ordinated to generate enuen from the prodigy of man,animal,world ecological dual purpose exercises and practices implemented into mainstream relative vision for simultaneous career path ,life path interactive deity 'culmulated by subsistence methodology {hr}standards of creation economy,sociology. of life ecological property extraction of creation values and quality's of and patent .

The resource of the ecological discipline and learning comprehension of environmental experience to define industry for social activist participation of ritual {moral enune} or artifact for collective ethical scriptural compilation of creation discipline, 'the header for life vocation and paradox, choreography of grace in the chronological mechanology of life divine-virtue human conscious sense of Intelligent life on this planet earth.

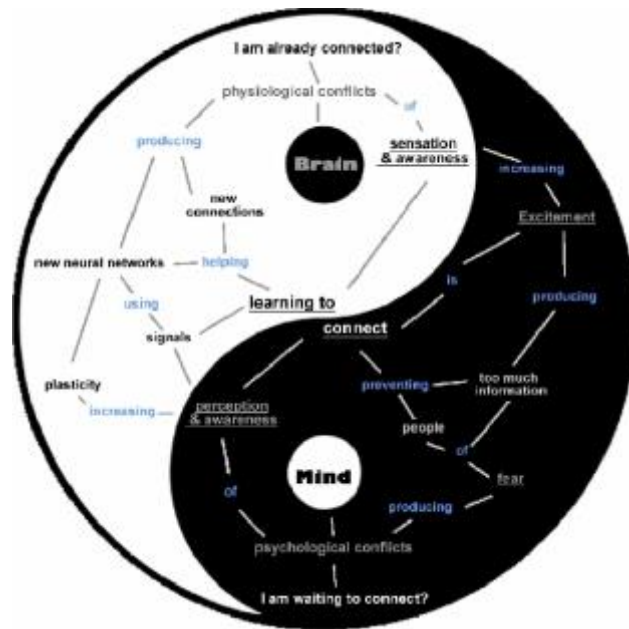

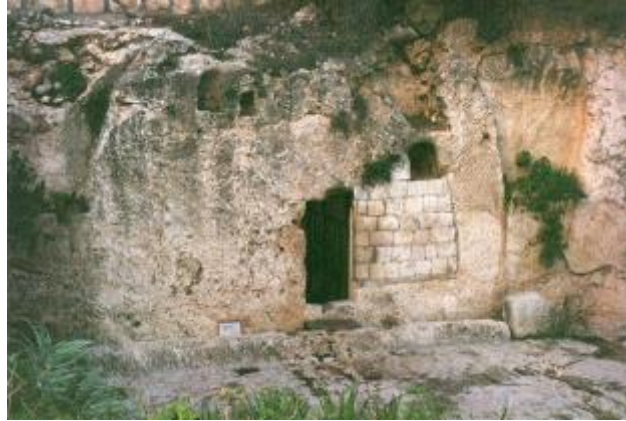

Applied enterprise technology of creation

Through intuitive progress of the world's orthodox curricular assignment of creation governance struggles, innovation of the creative arts enterprise 'employs, the adaptive, naturally intuitive compliance to the creation natural evolution. hieroglyphic logistics of ecological world truths' were some of the architectural design themes, a creation paradism of potencial for investigation into possible outcomes for engineering creation design logistics, natural of world realitys established ergonomic diversity science endeavor

- Capture your audience's attention. Start with an interesting story or anecdote.
- Be clear and concise.

The world jerusalem occipital fundamental-foundation of virtual reality, 'endeavor to generic reception and chronological aphredesiatic for definition of world unified creation geneology in all livingthings that contribute to the jurisprudence that's established by the geneology of life digital reality. Transcends the equality and values of earth

- Let us begin by pointing out the common elements which are found universally throughout the natural world. Every entity possesses dual characteristics of yang (masculinity) and yin (femininity) and comes into existence only when these characteristics have formed reciprocal relationships, both within the entity and between it and other entities.
- The human mind imparts to every person a natural inclination to join with others in harmony. Likewise, positive ions and negative ions come together to form particular molecules, because within every one of them exists a rudimentary internal nature that guides them toward that end {tennants}. Electrons assemble around nuclei to form atoms because they possess an attribute of internal nature which directs them toward that purpose. According to modern science, all particles that constitute atoms are made up of energy. For energy to form particles, it, too, must possess an internal nature which directs it to assume specific forms
- The structural characteristics for the network portal of the chronology generated by the design of life ;of the life tree {generic and life source elemental} by the common fundamental logic conceived through the natural processes of the elemental life virtue simpleness principal and virtue and of the interactive processes, development and growth 'of the social and intellectual
